PRINTING GUIDE

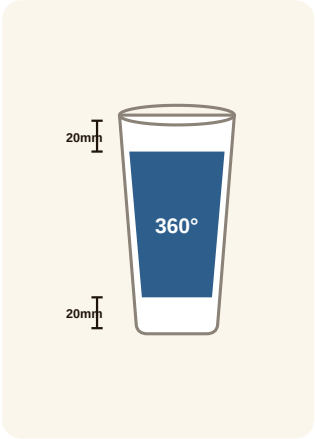

Reusable cups · Choose the right printing method for your design

SWIG AFRICA

SCREEN PRINTING

Large runs · all around the cup

The traditional technique, most cost-effective at scale. Ink is applied directly onto the cup, layer by layer — a matte, textured finish that withstands repeated washing extremely well.

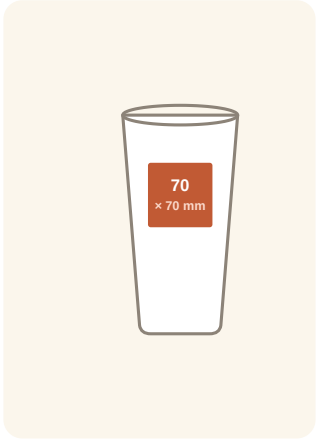

PRINT AREA	All around · 360°
COLOURS	1 to 4 solid tones
MARGINS	20 mm top & bottom
BEST FOR	Simple logos, high volumes

MINIMUM ORDER 200 units

DTF UV

Digital transfer · detail & small runs

A digital print cured under UV light, with no minimum on colours. Reproduces gradients, photos and highly detailed artwork with a crisp, glossy finish, even on small quantities.

PRINT AREA	1 position · 70 × 70 mm
COLOURS	Unlimited, gradients
FINISH	Crisp & glossy
BEST FOR	Logos, detailed artwork

MINIMUM ORDER 50 units

HEAT LABELLING / FULL COLOUR

Full wrap · 100% of the surface

An unlimited-colour wrap covering the entire cup, like a rolled-on label. Perfect for designs that go all the way around the cup, or for busy, image-heavy artwork.

PRINT AREA	100% surface · 360°
COLOURS	Unlimited
FINISH	Packaging-style
BEST FOR	Premium branding

MINIMUM ORDER 10,000 units

PRINTING GUIDE

Artwork requirements & conditions

SWIG AFRICA

Please read the following before submitting artwork for print. These points ensure your cups come out exactly as intended and form part of our order conditions.

07 ARTWORK, PRINT PROOF & COLOUR MATCHING

A print proof (artwork) is issued for every job. If the proof is not returned signed or approved by email or WhatsApp, no complaint relating to that job will be accepted.

Graphic files must be supplied in vector format: **AI, EPS, high-resolution PDF, or SVG**. The sale price includes the designer's work to adapt the Client's logo to Swig Cups' products, the creation of print positives, and the preparation of printing screens. It does not include the re-drawing or recreation of artwork where the files supplied are of poor quality (e.g. low resolution, incorrect format, non-vector files, or incomplete designs) — this work will be quoted separately.

Where the Client does not provide Pantone reference codes, the Company will make its best effort to match the desired colour, but no claim regarding the final shade will be accepted.

Screen printing, particularly on multi-colour designs, may be subject to a registration gap of up to **1–2 mm** between colours, depending on the printing technique used. This is an inherent characteristic of the screen printing process and does not constitute a non-conformity.

14 COMPLAINTS & NON-CONFORMITY

The Client must check the goods on receipt or collection. Any complaint regarding an apparent non-conformity (quantity, colour, artwork, condition) must be raised in writing within **7 days** of receipt or collection, with supporting photos where relevant. After this period, the order is deemed accepted without reservation and no claim will be entertained.

As noted in Article 07, no complaint will be accepted for a job where the print proof was not returned signed or approved. Where non-conformity is confirmed and attributable to the Company, the Company will, at its discretion, replace the affected items or issue a credit note, to the exclusion of any other compensation.
